

VICTOR

TECHNOLOGIES™

INNOVATION TO SHAPE THE WORLD™

Victor Technologies™ is pleased to announce its continued commitment to the welding and cutting industry through its Education Program in support of educators and their students.

At Victor Technologies, we are committed to helping build the future of this industry, not only to crafting better and safer equipment, but to the people that will use them... the next generation of welders. We recognize that the efficiency and precision of our tools would be lost without skilled hands to guide them. Sharing our experience and knowledge with the next generation is just as essential to the growth of our industry as the tools they will use.

The initial component of this new program is an enhanced education allowance provided through our distributors, providing a substantial

incentive for the sale of Victor Technologies family of brands to educational programs and vocational schools.

Effective immediately, Victor Technologies is now offering up to a 35% educational discount on initial orders for Victor Technologies products and consumable items.

We'll be updating you on future components of the our education program as they progress. For specific information regarding the distributor educational allowance, please contact your local welding distributor or email us at: marcom@VictorTechnologies.com.
