

Innovation & Economy

MicroBulk CENTRA-PAD

Bulk & MicroBulk Engineered Gas Systems

Our Central Cryogenics division specializes in engineered Bulk and MicroBulk gas systems for welding, beverage gases, food packaging, laboratories, and customer-specific applications.

Bulk & MicroBulk gas delivery insures an uninterrupted gas supply and greater economy than the delivery of cylinder gases. Our Gas Sales Engineers are experts at the latest innovations of economy for the fastest return on your investment.

Modular Gas Distribution Panel

Gas system controls are plumbed inside for easy access to pressure adjustments and distribution of the gas supply. The panel is custom-configured with various regulation and flow control components to satisfy a wide range of gas applications, where point of use regulation is the preferred method.

Applications:

- Lab
- Nitrogen Purging
- Autoclave
- Laser Assist Gas & Resonator Gases
- Aerospace
- Cutting Tables
- And many more...

CENTRA-PAD: Portable Bulk Tank Pad

Central Cryogenics gas system experts help customers expand their production through Bulk and MicroBulk service solutions. CENTRA-PAD portable pads can streamline the infrastructure required to incorporate bulk storage systems. CENTRA-PADs are available in different sizes to accommodate the installation.

- Small CENTRA-PAD: 10'x10' for up to 5,500 Liter MicroBulk
- Large CENTRA-PAD: 10'x15' for up to a 3,000 Gallon Bulk Tank

MicroBulk CENTRA-PAD Installation

Pictured is a recent installation of a 10'x10' precast concrete CENTRA-PAD that can accommodate up to a 5,500 Liter MicroBulk tank. The customer only needs to provide a suitable location to accommodate the installation of the equipment with access for our delivery vehicles. The CENTRA-PAD can be purchased or rented for a predetermined monthly amount, based on the size. Offering systems and services streamlined for economy allows Customers to expand production with little to no capital investment.
