**CONTAINER IDENTIFICATION:**

- **Cylinder Color Code:** Green
- **UN Number:** UN 1072
- **DOT Name:** USP Oxygen, Compressed
- **Hazard Class / Division:** 2.2
- **DOT Label:** Non-Flammable Gas and Oxidizer
- **CAS Number:** 7782-44-7

**CONTAINER CAPACITIES:**

Cylinders having capacities up to 251 Standard Cubic Feet (SCF)

**STANDARD VALVE OUTLET CONNECTION:**

CGA 540

**MEETS OR EXCEEDS THE FOLLOWING:**

- The United States Pharmacopoeia, USP XXII, Official Monograph / Oxygen

---

*The United States Pharmacopoeia (USP)* is a listing (compendium) of drugs licensed for use in the United States with the analytical standards necessary to establish purity suitable for human use applied to each of the listed drugs. Drugs sold for human consumption in the US must meet or exceed the purity standards listed in the USP. Drugs meeting these requirements must include a designation on their label that demonstrates compliance with standards listed within the USP; typically, this is shown as the initials USP immediately following the name of the drug. Many nations have their own Pharmacopoeia to list and specify requirements for drugs legally sold within their borders.
